

FEASIBILITY STUDY REPORT

Beede Waste Oil / Cash Energy Site
Plaistow, New Hampshire
Volume I - Text

Prepared for
New Hampshire Department of Environmental Services

Prepared by
Sanborn, Head & Associates, Inc.

File 1371
January 2002

INSTRUCTIONS FOR USE OF LINKS THROUGHOUT THIS REPORT:

Each section of this document can be accessed by clicking directly on the Table of Contents.

Some of the Appendix sections contain sub-sections which can be accessed by clicking Bookmark headings.

In each section and sub-section page 1 contains a link which takes the user back to the Table of Contents or the page which contains the section's Bookmarked links.

TABLE OF CONTENTS

VOLUME I

EXECUTIVE SUMMARY	i
List of Abbreviations, Acronyms, and Symbols	I
1.0 INTRODUCTION	1
1.1 Purpose of the FS and Organization of the FS Report	1
1.2 Site Background	2
1.2.1 Site Description	2
1.2.2 Site History	5
1.2.3 Previous Site Investigations and Remedial Activities	9
1.3 Site Hydrogeology	16
1.3.1 Site Climate	16
1.3.2 Site Geology	16
1.3.3 Surface Water Hydrology	16
1.3.4 Groundwater Hydrology	17
1.4 Nature and Extent of Contamination	18
1.4.1 Contaminant Source Areas	19
1.4.2 Distribution of Contaminants in Soil	20
1.4.3 Distribution of Contaminants in Free Product	21
1.4.4 Distribution of Contaminants in Groundwater	21
1.4.5 Distribution of Contaminants in Surface Water and Sediment	22
1.5 Contaminant Transport and Fate	23
1.6 Baseline Human Health and Ecological RAs	25
1.6.1 Human Health RA	25
1.6.2 Ecological RA	26
2.0 IDENTIFICATION/DEVELOPMENT OF ARARs AND TBCs, RAOs, GENERAL RESPONSE ACTIONS AND VOLUMES OF CONTAMINATED MEDIA	28
2.1 Identification and Compilation of ARARs and TBCs	28
2.1.1 Chemical-Specific ARARs and TBCs	29
2.1.2 Location-Specific ARARs and TBCs	29
2.1.3 Action-Specific ARARs and TBCs	29
2.1.4 Policy Considerations	30

2.2	Development of RAOs	30
2.2.1	Development of Soil RAOs	31
2.2.1.1	Soil COCs	31
2.2.1.2	Soil PRGs	34
2.2.1.3	Soil RAOs	35
2.2.2	Development of Groundwater RAOs	36
2.2.2.1	Groundwater COCs	36
2.2.2.2	Groundwater PRGs	36
2.2.2.3	Groundwater RAOs	37
2.2.3	Development of Sediment (and Surface Water) RAOs	38
2.2.3.1	Sediment COCs	38
2.2.3.2	Sediment RAOs	38
2.3	Development of General Response Actions	39
2.3.1	Soil General Response Actions	39
2.3.2	Groundwater General Response Actions	39
2.3.3	Sediment General Response Actions	39
2.4	Areas and Volumes of Contaminated Media	39
2.4.1	Areas and Volumes of Contaminated Soil	40
2.4.2	Areas and Volumes of Landfill and Associated Contaminated Soil	42
2.4.3	Areas and Volumes of Contaminated Groundwater	42
2.4.4	Area and Volume of Contaminant Sediment	43
3.0	SCREENING AND EVALUATION OF TECHNOLOGIES AND PROCESS OPTIONS	44
3.1	Identification and Screening of Technologies and Process Options	44
3.1.1	Soil and Sediment	44
3.1.2	Groundwater	45
3.2	Evaluation and Selection of Technologies and Process Options	47
3.2.1	Evaluation and Selection of Technologies and Process Options for Soil	48
3.2.1.1	No Action	48
3.2.1.2	Limited Action	49
3.2.1.3	Containment	52
3.2.1.4	Disposal	56
3.2.1.5	Ex-Situ Treatment	59
3.2.1.6	In-Situ Treatment	68
3.2.1.7	Summary of Selected Technologies and Process Options for Soil	75
3.2.2	Evaluation and Selection of Technologies and Process Options for Groundwater	76
3.2.2.1	No Action	76
3.2.2.2	Limited Action	77
3.2.2.3	Containment	79

3.2.2.4 Collection	83
3.2.2.5 Ex-Situ Treatment	84
3.2.2.6 Discharge	97
3.2.2.7 In-Situ Treatment	101
3.2.2.8 Summary of Selected Technologies and Process Options for Groundwater	103
4.0 DEVELOPMENT OF REMEDIAL ACTION ALTERNATIVES	105
4.1 Rationale for Development of Remedial Action Alternatives	106
4.1.1 Statutory and Policy Guidance	107
4.1.2 Protection of Human Health	107
4.1.3 Protection of Groundwater	107
4.1.4 Protection of Ecological Receptors	108
4.1.5 Floodplain/Wetland Considerations	109
4.1.6 Future Reuse of the Property	110
4.2 Common Actions	110
4.3 SC Alternatives Descriptions	115
4.3.1 Alternative SC-1: No Action	115
4.3.2 Alternative SC-2: Limited Action	116
4.3.3 Alternative SC-3: Hot Spot Removal, Capping, and In-Situ Treatment	117
4.3.3.1 Key Considerations	118
4.3.3.2 Surface/Shallow Soil “Hot Spot” Removal	120
4.3.3.3 Permeable Soil Cover	122
4.3.3.4 Capping of On-Site Landfill	123
4.3.3.5 Sediment Excavation and Disposal	126
4.3.3.6 Wetlands Restoration/Compensatory Wetlands Construction	129
4.3.3.7 In-Situ Treatment of Deep Soil	130
4.3.4 Alternative SC-4: Off-Site Treatment/Disposal	138
4.3.4.1 Key Considerations	139
4.3.4.2 Soil Pile Removal and Disposal	140
4.3.4.3 Surface/Shallow and Subsurface Soil Excavation and Disposal	141
4.3.4.4 Deep Soil Excavation and Disposal	146
4.3.4.5 Landfill Excavation and Disposal	150
4.3.4.6 Sediment Excavation and Disposal	153
4.3.4.7 Wetlands Restoration	153
4.3.4.8 Post-Excavation Activities	155
4.3.5 Alternative SC-5: Off-Site Treatment/Disposal (0 - 10 feet bgs Soil) and In-Situ Treatment (>10 feet bgs Soil)	155
4.3.5.1 Soil Pile Removal and Disposal	157
4.3.5.2 Surface/Shallow and Subsurface Soil Excavation and Disposal	157
4.3.5.3 Landfill Excavation and Disposal	157

4.3.5.4	Sediment Excavation and Disposal	157
4.3.5.5	Wetlands Restoration	158
4.3.5.6	Post-Excavation Activities	158
4.3.5.7	In-Situ Treatment of Deep Soil	159
4.3.6	Alternative SC-6A: On-Site Ex-Situ Thermal Treatment	160
4.3.6.1	Ex-Situ Indirect-Heated Thermal Desorption Treatment	162
4.3.6.2	Soil Pile Treatment and Disposal	165
4.3.6.3	Surface/Shallow and Subsurface Soil Excavation, Treatment, and Disposal	167
4.3.6.4	Deep Soil Excavation, Treatment, and Disposal	171
4.3.6.5	Landfill Excavation and Treatment/Disposal	173
4.3.6.6	Sediment Excavation and Treatment/Disposal	174
4.3.6.7	Wetlands Restoration	174
4.3.6.8	Post-Excavation Activities	175
4.3.7	Alternative SC-6B: On-Site Ex-Situ Thermal Treatment (0 - 10 feet bgs Soil) and In-Situ Treatment (>10 feet bgs Soil)	175
4.3.7.1	Ex-Situ Indirect-Heated Thermal Desorption Treatment	177
4.3.7.2	Soil Pile Treatment and Disposal	177
4.3.7.3	Surface/Shallow and Subsurface Soil Excavation, Treatment, and Disposal	177
4.3.7.4	Landfill Excavation and Treatment/Disposal	178
4.3.7.5	Sediment Excavation and Treatment/Disposal	178
4.3.7.6	Wetlands Restoration	178
4.3.7.7	Post-Excavation Activities	179
4.3.7.8	In-Situ Treatment of Deep Soil	179
4.4	MOM Alternatives Descriptions	181
4.4.1	Alternative MOM-1: No Action	181
4.4.2	Alternative MOM-2: Limited Action	182
4.4.3	Alternative MOM-3: Groundwater Collection and Treatment (Higher Pumping Rate)	183
4.4.3.1	Pre-Design Investigations	183
4.4.3.2	Conceptual Design of Groundwater Collection and Treatment System (High Pumping Rate)	184
4.4.3.3	Clean-up Time Frame	190
4.4.3.4	Natural Attenuation of Selected Source Areas/ Contaminated Groundwater Plumes	190
4.4.3.5	Demobilization/Decommission	192
4.4.4	Alternative MOM-4: Groundwater Collection and Treatment (Lower Pumping Rate)	193
4.4.4.1	Pre-Design Investigations	194
4.4.4.2	Conceptual Design of Groundwater Collection and Treatment System (Low Pumping Rate)	194
4.4.4.3	Clean-up Time Frame	196
4.4.4.4	Natural Attenuation of Selected Source Areas/ Contaminated Groundwater Plumes	196
4.4.4.5	Demobilization/Decommissioning	196
4.4.5	MOM Alternative Not Carried Forward	197

5.0	DETAILED ANALYSIS OF ALTERNATIVES	198
5.1	Criteria for Evaluation of Alternatives	198
5.2	Individual Analysis of SC Alternatives	202
5.2.1	Alternative SC-1: No Action	202
5.2.2	Alternative SC-2: Limited Action	204
5.2.3	Alternative SC-3: Hot Spot Removal, Capping and In-Situ Treatment	207
5.2.4	Alternative SC-4: Off-Site Treatment/Disposal	212
5.2.5	Alternative SC-5: Off-Site Treatment/Disposal (0 - 10 feet bgs Soil) and In-Situ Treatment (> 10 feet bgs Soil)	216
5.2.6	Alternative SC-6: On-Site Treatment	221
5.3	Comparative Analysis of SC Alternatives	226
5.3.1	Overall Protection of Human Health and the Environment	226
5.3.2	Compliance with ARARs	227
5.3.3	Long-Term Effectiveness and Permanence	227
5.3.4	Reduction of Toxicity, Mobility and/or Volume Through Treatment	228
5.3.5	Short-Term Effectiveness	229
5.3.6	Implementability	231
5.3.7	Cost	233
5.4	Individual Analysis of MOM Alternatives	234
5.4.1	Alternative MOM-1: No Action	234
5.4.2	Alternative MOM-2: Limited Action	236
5.4.3	Alternative MOM-3: Groundwater Collection and Treatment (High Pumping Rate)	239
5.4.4	Alternative MOM-4: Groundwater Collection and Treatment (Low Pumping Rate)	244
5.5	Comparative Analysis of MOM Alternatives	249
5.5.1	Overall Protection of Human Health and the Environment	249
5.5.2	Compliance with ARARs	250
5.5.3	Long-Term Effectiveness and Permanence	250
5.5.4	Reduction of Toxicity, Mobility and/or Volume Through Treatment	251
5.5.5	Short-Term Effectiveness	251
5.5.6	Implementability	252
5.5.7	Cost	253
6.0	REFERENCES	254

APPENDICES

- Appendix A Limitations
- Appendix B Potential Applicable or Relevant and Appropriate Requirements (ARARs) and To-Be-Considered Guidelines (TBCs)
- Appendix C Numerical and Analytical Groundwater Flow and Contaminant Transport Modeling
 - C.1 Numerical Groundwater Flow Model Development and Modeling Results
 - C.2 Effects of Potential Rate-Limiting Processes on Dissolved Phase Contaminant Recovery
 - C.3 Impact of Contaminated Groundwater Plume Discharge on Kelly Brook Water Quality
 - C.4 Estimation of Source Area Persistence Under Pumping Conditions and No Source Control Measures
 - C.5 Development of Leaching to Groundwater-Based PRGs for Soil
- Appendix D Media Volume Estimate Calculations
 - D.1 November 11, 1999 Memorandum - Sampling and Analysis Program to Evaluate Soil Potentially Hazardous for Lead and Other Characteristics
 - D.2 Soil Volume Calculations
 - D.3 Landfill Volume Calculations
 - D.4 Groundwater Volume Calculations
- Appendix E Source Control (SC) Alternatives - Cost Estimates and Supporting Information
 - E.1 SC-1: No Action Alternative
 - E.2 SC-2: Limited Action Alternative
 - E.3 SC-3: Hot Spot Removal, Capping, and In-Situ Treatment of Deep Soil
 - E.4 SC-4: Off-Site Treatment/Disposal
 - E.5 SC-5: Off-Site Treatment/Disposal (0-10 feet bgs Soil) and In-Situ Treatment (>10 feet bgs Soil)
 - E.6 SC-6A: On-Site Ex-Situ Thermal Treatment
 - E.7 SC-6B: On-Site Ex-Situ Thermal Treatment (0-10 feet bgs Soil) and In-Situ Treatment (>10 feet bgs Soil)
- Appendix F Management of Migration (MOM) Alternatives - Cost Estimates and Supporting Information
 - F.1 MOM-1: No Action Alternative
 - F.2 MOM-2: Limited Action Alternative
 - F.3 MOM-3: Groundwater Collection and Treatment (High Pumping Rate)
 - F.4 MOM-4: Groundwater Collection and Treatment (Low Pumping Rate)
 - F.4.1 MOM-4: 80 gpm Groundwater Collection and Treatment System (Alternative Carried Forward)
 - F.4.2 MOM-4: 30 to 40 gpm Groundwater Collection and Treatment System with Slurry Wall and Cap (Alternative not Carried Forward)
- Appendix G Post-RI Water Quality Results
 - G.1 Groundwater Quality Data - Volatile Organic Compounds (including July 1999 and September 2000 monitoring rounds by NHDES)
 - G.2 Groundwater Quality Data - Natural Attenuation/Water Quality Parameters (including July 1999 and September 2000 monitoring rounds by NHDES)
 - G.3 NHDES Residential Well Data Through October 2000

- G.4 Analytical Results for 'Background' Surface Water Samples Collected November and December 1999
- Appendix H PRG Memorandum Dated November 10, 2000 from Menzie-Cura & Associates, Inc.
- Appendix I Revisions to NHDES RCMP Dated October 2000
